

Screenshots of errors:

Create Record

Goto create new "defect" record...

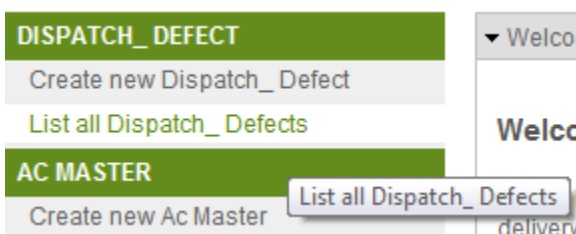

The screenshot shows a web application interface. On the left is a sidebar menu with two main sections: 'DISPATCH_DEFECT' and 'AC MASTER'. Under 'DISPATCH_DEFECT', there are two options: 'Create new Dispatch_Defect' (highlighted in green) and 'List all Dispatch_Defects'. Under 'AC MASTER', there are two options: 'Create new Ac Master' and 'List all Ac Masters'. On the right is a form titled 'Create new Dispatch_Defect'. The form contains four input fields: 'Defect Type' with the value 'TEST', 'Defect Number' with the value 'TEST', 'Defect Item' with the value '01', and 'Aircraft' with the value '7714'. Below the input fields is a 'SAVE' button.

Click save... it will succuesfully save the record to the database, but then this error comes up:

List Records

The other error is when you try to list the defect records:

▼ Data access failure

Data access failure

Sorry, a problem occurred while accessing the database.

Details

▶ Exception Message

▶ Exception Stack Trace

The error is because it's doing a "select count()" with multiple parameters being passed to the count()... Oracle doesn't seem to like that.
